- **11,000m<sup>2</sup>** - 2 warehouses
- **Neutral & Independent**
- **.Customs & Excise bonded**
- **Low Cost Structure**
- **Highly flexible**
- **Professional staff**

One of our greatest assets is our location, right at the heart of the Port of Antwerp, one of the main gateways to Western Europe.

60% of Europe's purchasing power lies within a range of 300 miles around Antwerp.

Since 2007, the Antwerp region stays in pole position for European logistics operations.

Backed-up by a strong Logistics Group, we're one of the leaders in neutral 3PL operations.

Our activities are mainly linked to our position in the port area, such as stripping and stuffing of containers or trucks, lashing and securing inside the containers or truck and handling of groupage cargoes inbound or outbound. These operations of course also imply the secure storage of the goods while they remain in the warehouse, waiting to be consolidated.

Strongly specialized services are offered for all kind of project cargoes. We have a lifting capacity up to 25T per piece and can handle out-of-gauge cargoes. We also handle containers with iron & steel products. Any type of container can be handled: dry vans, open tops, flat racks or others.

We also strongly focus on value added services. Our warehouses are customs bonded, with an AEO certification. We can perform all clearance services, inclusive fiscal representation or all transit operations, inclusive transit storage. We have also an excise bond for wines & spirits or tobacco.

Our premises are equipped to handle IMO/ADR goods, except for classes 1 and 7. Dangerous goods can even remain for a short storage period.

Stock keeping and accurate order picking is another important feature we can offer at our warehouses, no matter the number of SKU's we have to keep on track.

And of course we do the (re-)labeling or (re-)packing of all kind of goods and can even organize small assemblies.

Then we organize the domestic transportation.

And if you require any assistance in the port, to obtain the delivery from the shipping line, we are here to assist.

## Service is our credo, Security our motto

Our main focuses go to service to our customers and security above all. Particular attention is paid to the security of our people, security of the cargoes we handle and store and to the environmental issues.

Our professional and trustworthy staff is with us for many years which reduced strongly the risks of theft or pilferage and increases the overall security procedures.

After office hours, the goods and premises are secured by an alarm system, security guards and a 24/7 camera surveillance.
